PROFESSIONAL SUMMARY

System Administrator with 2 years of Application & Production Support experience in incident management, application monitoring, and SQL-based troubleshooting. Skilled in Azure Monitor, Azure Log Analytics (KQL), SQL, Python, and REST APIs, with experience automating operational reporting and analyzing data in SLA-driven enterprise environments.

SKILLS

Application Support: Production Support, Incident Management, Root Cause Analysis (RCA), SLA Management, ServiceNow, Application Monitoring, ITIL Concepts

SQL & Data Analysis: SQL (Joins, CTEs, Window Functions, Subqueries), Data Validation, KPI Analysis, Operational Reporting

Monitoring & Cloud: Azure Monitor, Azure Log Analytics (KQL), Log Analysis, Performance Monitoring

Reporting & BI: Power BI (Dashboard Development, DAX), Excel (Pivot Tables, Power Query)

Programming & Tools: Python, MySQL, REST APIs (Postman), Git, ETL Concepts, Databricks

EXPERIENCE

Tata Consultancy Services

Aug 2024 – Present

System Administrator (Application Support Engineer)

Pune, India

- Monitored 10K+ enterprise application logs via Azure Monitor and Azure Log Analytics (KQL), proactively flagging anomalies and accelerating incident resolution to sustain application uptime.
- Diagnosed production issues by correlating application logs with SQL data across enterprise platforms to identify anomalies, strengthening service reliability and SLA compliance.
- Automated recurring operational reports and workflows using SQL, Python, and REST APIs, cutting manual effort by 20% and improving reporting turnaround while validating and processing 15K+ operational records with cross-functional teams.
- Consistently ranked among the top 3 performers on a production support team handling 400+ cases/month, personally resolving 89 – 141 cases monthly within a service line maintaining 99.8% SLA compliance and 96.9% customer satisfaction.
- Recognized through multiple client appreciations for effective handling of production outages and incident resolution.

PROJECTS

E-Commerce Sales & Customer Analytics | SQL, Python, Power BI

- Analyzed 3,900+ customer transactions with SQL and Python to surface revenue trends and customer segmentation insights.
- Built interactive Power BI dashboards tracking sales performance, retention, and product KPIs for data-driven decisions.

CO2e Emissions Analysis | Databricks, SQL

- Analyzed global CO2 emissions using Databricks SQL across countries, regions, and per-capita measures, identifying emission trends and high-emitting regions.
- Developed Databricks dashboards to visualize emission patterns and support data-driven insights into population-emissions relationships.

Inventory Management System | Python, MySQL

- Built a database-driven inventory system in Python and MySQL to automate stock tracking and order processing.
- Designed relational schema with CRUD operations and data validation, improving data integrity and efficiency.

EDUCATION

Master of Computer Applications (MCA)

Pursuing 2026 – 2028

Manipal Academy of Higher Education (MAHE)

Bachelor of Computer Applications (BCA)

2021 – 2024

Maharishi Dayanand University | CGPA: 7.7/10
